EUROPEAN  
MOULD SPECIALIST

Dorel Netherlands, 200 employees, is a subdivision of Dorel Europe. This European Organisation offers a wide range of products for babies and young children with the brands Quinny, Maxi-Cosi, Bébé Confort, Hoppop, Safety 1st, BabyArt and Babidéal. Dorel operates from ten European bases. The offices in Helmond, Netherlands, and Cholet, France, together form the Competence Centre, where close collaboration takes place in developing brand and marketing strategies. These locations are also responsible for the management of the Supply Chain and global distribution to more than 80 countries. In addition, sales to the Dutch and export markets take place at the Helmond location.

Our success is achieved thanks to an enthusiastic and committed team of professionals and a clear focus on creativity and innovation. Dorel is an informal organisation with short lines of communication and a pleasant and open work atmosphere.

We are currently looking for a  
**European Mould Specialist.**

As European Mould Specialist you are responsible for all activities related to the production, modification and maintenance of tools for plastic parts. This requires working closely with Dorel's Development and CAD teams and the suppliers of plastic parts. Besides the technical aspects, there is a commercial link with Dorel Europe's Purchasing Department in order to purchase the right moulds for the best price. Although you are located in the Helmond office, you can be found in France (development), Portugal (production) and China (mould manufacturing) frequently, which means frequent worldwide travel is a significant part of the job.

As European Mould Specialist you report to the Development Car Restraint Systems (CRS) Manager, but your experience and skills will be available for all products categories.

#### Key responsibilities

- Advice and interact with (CRS) Engineers during concept and development phase to develop optimal solutions for both part- and tool design
- Be leading during Requests For Quotations (RFQ's) for tools
- Track tool making progress and provide updates to the CRS team
- Coordinate and communicate with tool suppliers from first samples to production start of new or modified products

#### Requirements

- At least 10 years experience in the development of tools for plastic moulded parts for high volume consumer goods
- Experience in consumer goods product development processes
- A network of relevant tool suppliers
- Team oriented: supporting the overall goals, actively participating, and appreciating the unique skills and contributions of other team members
- A self-starter who commits to and owns responsibility for timely completion of assigned projects or deliverables
- Well organised: ability to schedule and track multiple projects
- A good listener with strong writing and verbal communication skills in English
- Skilled in explaining technical matters to non-technical oriented people
- Able to establish and maintain open and honest channels of communication with internal and external stakeholders
- Tactful, truthful, yet powerful in all working relationships while representing Dorel and its interests

#### Interested?

You can find more information and an application form on our website [www.dorel.nl](http://www.dorel.nl). For questions, please contact: Sanne van Schoonveltdt, HR Officer: +31 (0)492845704, [sanne.vanschoonveltdt@dorel.eu](mailto:sanne.vanschoonveltdt@dorel.eu)
